

STUDENTS

Schlegel Villages welcomes students who are learning to work in health care and related fields. They spend part of their training in our Villages to practice what they have learned in school.

Students are treated like part of our Village family, just like our team members. We support high school co-op students, college and

university students, and other learning placements.

Before they begin, all students receive an orientation and complete the same safety and screening requirements as new team members.

Many students enjoy their experience here and later return to work with us.

—The Living— Classroom

at Schlegel Villages

In partnership with some of the province's leading educators, The Living Classrooms at Schlegel Villages provides students the opportunity for experiential learning in the Village's supportive environment while learning the fundamentals of person-centred care.
